

THE PROGRAM OF
THE NATIONAL SOCIALIST AMERICAN PARTY
2025

TYLER VENTZEL | PARTY LEADER

Tyler Ventzel

THE PROGRAM OF THE NATIONAL SOCIALIST AMERICAN PARTY

I. National Identity & Political Renewal

1. Abolition of Political Lobbying – We demand an immediate end to political bribery, commonly disguised as “lobbying.” Political campaigns shall be financed exclusively by the people, guaranteeing candidates genuine freedom to run without burdensome monetary barriers.

2. Leadership Based on Merit & Service – We demand our leaders be chosen for their competence, discipline, and service, rather than their wealth or party connections. Political training in governance, economics, and strategy must be required for all candidates.

3. Decentralization of Bureaucracy – We demand the reduction or consolidation of excessive government agencies for efficiency and accountability. Bureaucracy must serve the people, not hinder progress. To prevent political entrenchment, agency leaders will have strict term limits and remain fully accountable to elected officials.

4. Citizenship Reform – (*Legal Definition of American Nationality*) We demand the immediate repeal of the Hart-Celler Act of 1965. Citizenship status shall be defined as follows:

A. American Nationals: Individuals of European Descent who pledge their loyalty shall be recognized as American Nationals, possessing full rights within the union of the fifty states.

B. Honorary American Nationals: Descendants of Slavery, Members of Indian Tribes, and other Non-White Individuals with proof of family roots dating back to or before 1965 shall be recognized as Honorary American Nationals, possessing rights to live and work within the union of the fifty states.

No individual outside these categories shall hold the title “*American National*.”

II. Economic Strength & Workers’ Rights

5. Direct Representation of Workers & Families – Worker councils and family organizations will be established to provide direct input into policymaking, ensuring that the working people and families who build our nation have a powerful and recognized voice in governance.

6. National Labor and Technological Integration Policy – American labor shall be prioritized within national industries, with strict bans on foreign outsourcing to protect domestic jobs. Large national industries will adopt worker participation and profit-sharing models, ensuring economic security for the workforce. However, recognizing the inevitability of automation, robotics and AI shall be integrated responsibly—enhancing productivity while maintaining a strong labor force. Industries must implement policies that balance efficiency with job retention, ensuring that technological progress benefits American workers rather than displacing them.

THE PROGRAM OF THE NATIONAL SOCIALIST AMERICAN PARTY

7. Self-Sufficient Manufacturing & Infrastructure Investment – The nation will restore its industrial might by rebuilding national factories, technological centers, and supply chains—ending reliance on foreign imports.

8. Right to Repair & Ban on Planned Obsolescence – Manufacturers will be required to produce durable goods and provide the necessary parts for repairs. Built-in obsolescence will be banned, ensuring that technology and tools last for generations.

9. Fair Wages & Strong Labor Protections – Workers will be paid according to their productivity, with a minimum living wage and no wage caps for highly productive individuals. Wage theft, corporate loopholes, foreign exploitation of labor, and instances of extreme profiteering will be severely punished. We demand therefore the revocation of all foreign worker visas.

10. End of Speculative Land & Housing Markets – Single Family Homes will be treated as a necessity, not a speculative asset. Landlords will be heavily restricted, while foreign ownership of American land, structure, or any property will be abolished. Sqft prices of land / property will be standardized, and the expropriation of land for communal purposes will be considered for our national requirements.

11. The Family Home Loan Program: To strengthen families and ensure homeownership is accessible, we propose an interest-free home loan program for newly married couples who will commit to having a minimum of four children within eight years. For every child born 25% of the loan is forgiven. These families will have their monthly payments capped at an affordable rate, providing long-term housing stability.

III. Agriculture & Food Security

12. Abolition of Processed & Artificial Foods – Seed oils, high-fructose corn syrup, artificial dyes / flavors, modified starches, synthetic chemicals and single use plastics will be banned. Food purity laws will be enforced to ensure that meals nourish, rather than weaken, the people. The State must ensure that the nation's health standards are raised by promoting organic foods.

13. Prioritization of Small Farms Over Corporate Agribusiness – Independent farmers will be supported through state-backed cooperatives, subsidies, and land protection laws. Industrial agriculture monopolies will be dismantled.

14. Urban Farming & Sustainable City Food Systems – Mandatory green spaces, rooftop farms, and vertical farming programs will ensure cities can sustain their own food supply without reliance on fragile and foreign supply chains.

15. End of Foreign Ownership of Farmland – All American farmland must be owned by American Nationals/Citizens. Foreign land grabs will be dismantled, and stolen land will be returned to the people.

THE PROGRAM OF THE NATIONAL SOCIALIST AMERICAN PARTY

16. A National Food Stockpile & Agricultural Research Initiative – The nation will maintain grain, livestock, and produce reserves to prevent shortages. Research into sustainable farming, soil regeneration, and nutritional enhancement will be prioritized.

IV. National Family & Social Structure

17. Restoration of the Traditional Family – The nuclear family will be reinforced. All degenerate policies that weaken marriage, fatherhood, and motherhood will be eliminated.

18. Incentives for Large Families – Families with three or more children will receive housing assistance, and financial rewards. Child-rearing will be treated as a sacred duty to the nation. Tax Exemptions will no longer be needed as Taxation is Eliminated.

18. Marriage Reform & End of No-Fault Divorce – Marriage is a lifelong commitment, not a disposable contract. No-fault divorce will be abolished, and pre-marital counseling will be required. Divorce will only be allowed in cases of infidelity, abuse, or abandonment. Marriage is between a Man and a Women. Homosexuality will be outlawed. Current Homosexual Marriage Certificates are Null and Void. Those who are Homosexuals will be moved into psychiatric wards for evaluation and treatment.

19. End of Welfare Dependency – No more handouts for idleness. Welfare programs will be tied to national service, labor, or education programs, ensuring that assistance is earned through contribution.

V. Education, Culture & National Strength

20. Abolition of Useless Educational Requirements – Students will only take courses relevant to their field. Trade schools, military schooling, engineering programs, and medical apprenticeships will replace pointless degree requirements.

21. Education Living Centers – The Birthplace of Geniuses – Universities will be nationalized and transformed into research-driven institutions where high-performing students are paid for their education. Tuition will be replaced by state sponsorship, and housing and money allowances will be provided to students pursuing critical fields.

22. Strict Cultural Purification & Artistic Renaissance – All subversive and degenerative media will be abolished. Traditional arts, music, literature, and national cinema will be promoted, ensuring that art uplifts, rather than downgrades, national identity.

THE PROGRAM OF THE NATIONAL SOCIALIST AMERICAN PARTY

23. Firearms Rights & Universal Self-Defense Training – Every law-abiding citizen will have the right to own, carry, and train with any firearms. Mandatory firearms education and self-defense training will ensure a militant, disciplined citizenry. We therefore demand the Abolition and replacement of the ATF (*Bureau of Alcohol, Tobacco, Firearms and Explosives*). Americans must be made free.

24. Physical Fitness & National Health Goals – Daily exercise and self-defense training will be mandatory for all youth enrolled in a federal funded school, ensuring that the next generation is physically and mentally resilient.

25. Abolition of Corporate-Controlled Healthcare – Medicine will be Federally funded but state&public-controlled, ensuring that healthcare is about prevention and health, not pharmaceutical profits. We therefore demand the Abolition and Replacement of the FDA, CDC, and HHS.

VI. National Defense & Sovereignty

26. Massive Military Expansion & National Service Requirement – All male citizens must serve at least two years in military or military reserves, or participates in infrastructure projects, overseen by the NLF (National Labor Front). We therefore demand the creation of the NLF.

27. Peace Through Strength & Diplomacy First Policy – The United States will prioritize diplomacy and peaceful resolutions in all international affairs, seeking cooperation before conflict. Diplomatic channels, trade agreements, and strategic alliances will be the first course of action in resolving disputes and securing national interests. However, if all peaceful efforts fail and American sovereignty, security, or vital interests are threatened, decisive military action will be taken. War will always be the last resort, but when necessary, it will be executed with overwhelming force to ensure swift victory and lasting security.

As part of this policy, we will withdraw from NATO, ending entangling alliances that compromise national autonomy. Instead, European nations will transition into protectorate states, ensuring stability while allowing America to dictate strategic military and economic policies in the region. This shift will guarantee that European security aligns with American interests while preventing foreign entanglements that do not serve the nation's long-term goals.

28. Total Border Control & National Security Overhaul – Immigration will be strictly limited to those who are of European descent & prove loyalty and cultural alignment. Our borders will be protected by our military. Any perceived violation of this demand & policy will be met with decisive military recourse.

THE PROGRAM OF THE NATIONAL SOCIALIST AMERICAN PARTY

VII. Tax Reform & Monetary Independence

29. Repeal of the Unconstitutional 16th Amendment – The Sixteenth Amendment, which allows Congress to levy an income tax without apportioning it among the states, will be repealed to restore a fair and balanced tax system.

30. Taxation Reform & IRS Replacement – The Internal Revenue Service (IRS) will be dismantled, and all taxation and revenue collection will be transferred to a restructured Department of Treasury under strict oversight. This system will simplify and reduce taxation, & reduce bureaucracy. Money is a tool for engaging in commerce. Money should not be used to hold Americans hostage to a banking cartel.

31. Nationalization of Banking & Monetary Sovereignty – All private banks tied to the Federal Reserve System will be nationalized, bringing monetary control directly under the Department of Treasury. The private Federal Reserve will be abolished, ensuring currency issuance and financial policy serve the people, not private banking interests.

32. Restructuring of Global Financial Policy – America will reassess and restructure its participation in the SWIFT payment system to secure financial independence and prevent foreign influence over domestic economic affairs. Additionally, we will explore the use and integration of decentralized cryptocurrencies such as Bitcoin, Ethereum, Monero, and Algorand as alternative financial instruments to enhance economic resilience, privacy, and financial sovereignty.

33. Abolition of Usury & Speculative Banking – Predatory, interest-based lending will be abolished, and speculative banking practices will be tightly regulated. The financial system will prioritize productive investment over parasitic wealth extraction, ensuring economic stability and long-term national prosperity.

Explanation & Demand:

Under the NSAP program, all currency is issued directly by the Department of Treasury—not conjured into existence as interest-bearing debt by a private central bank. The government spends this debt-free money into the real economy to pay Americans for the work, goods, and services that advance the nation's welfare. Because money enters circulation without a price tag attached, there is no compounding national debt owed to bankers. The Federal Reserve and its cartel of profit-driven member banks are abolished, and banking is transformed into a true public utility: deposits are fully secured, credit is extended at no interest for productive purposes, and speculative gambling is outlawed.

THE PROGRAM OF THE NATIONAL SOCIALIST AMERICAN PARTY

Taxation is repurposed from a revenue tool into a monetary regulator. Since the government can create the currency it needs to meet public obligations, it no longer has to raid the paychecks, property, or inheritances of its citizens. The single remaining levy is a small, variable consumption tax applied only at the point of purchase. Its sole mission is to withdraw excess currency from circulation when needed, thereby stabilizing prices and preventing inflation. When the money supply must expand to spur growth, the rate can be lowered just as swiftly. In short: money flows into the economy interest-free, and it is gently skimmed back out only when people choose to spend.

This model rewards productive labor and honest commerce, not parasitic finance. Americans keep what they earn, and the nation's wealth is built on tangible work rather than speculative bubbles. The economy finally serves the people—never the bankers.

All of the following taxes are eliminated under the NSAP system: *federal income tax, state and local income taxes, payroll taxes (Social Security and Medicare), self-employment tax, alternative minimum tax, corporate income tax, franchise and gross-receipts taxes, capital-gains tax, gift tax, inheritance and estate (“death”) taxes, property taxes, personal-property (vehicle) taxes, use taxes, excise taxes on gasoline, diesel, aviation fuel, airline tickets, alcohol, tobacco, firearms, luxury goods, sugary drinks, vehicle and tire fees, phone and utility taxes, cable and streaming surcharges, hotel and lodging taxes, short-term rental taxes, car-rental taxes, amusement and admissions taxes, parking taxes, boat excise taxes, hunting and fishing license fees, dog-license taxes, passport fees, plastic-bag and bottle taxes, storm-water and environmental fees, special assessments, and every other hidden levy now siphoning wealth from the American worker.*

Only the adjustable consumption tax remains, calibrated solely to balance the money supply.

VIII. National Infrastructure & Technological Advancement

34. Comprehensive Infrastructure Overhaul – We demand a nationwide revitalization of roads, bridges, railways, energy grids, and water systems to ensure modernization, efficiency, and long-term durability. All infrastructure projects will prioritize domestic materials, labor, and engineering to create jobs and secure national self-reliance.

35. National High-Speed Rail & Public Transit Expansion – We will invest in a high-speed rail network connecting major cities, reducing dependency on foreign oil, and providing an efficient, cost-effective transportation alternative. Additionally, public transit systems will be expanded and modernized to ensure accessibility and affordability for all citizens.

THE PROGRAM OF THE NATIONAL SOCIALIST AMERICAN PARTY

36. Energy Independence & Grid Security – The national power grid will be modernized, decentralized, and reinforced to protect against cyber threats, foreign manipulation, and system failures. Investment in nuclear, hydroelectric, and clean energy will ensure long-term sustainability and independence from foreign energy interests.

37. Rural Development & Connectivity – Infrastructure funding will prioritize rural communities, ensuring access to modern roads, clean water, internet, and essential services. No American will be left behind due to geographic isolation.

38. Advanced Research & Development – National investment will focus on cutting-edge technologies in construction, engineering, and automation, ensuring that the nation remains at the forefront of technological progress while maintaining a strong skilled labor force.

39. National Space & Aerospace Initiative – America will reclaim its leadership in aerospace innovation and space exploration through a comprehensive strategy. Mars and the Moon will be colonized, with space mining, orbital defense, and deep-space exploration as national priorities to secure American dominance beyond Earth. Simultaneously, the aviation industry will be revitalized by modernizing air travel infrastructure, expanding domestic manufacturing, and advancing aerospace technology to serve national interests.
